EXPERIENCE

CGI May 2022 — Present

Product Designer

- Conducted collaborative workshops with key stakeholders and users in order to understand current user and process flows, major pain points, and the primary goals for the new software
- Created user personas for each role and user flows for each task that will need to be performed
- Communicated research findings and a recommended roadmap to leadership and key stakeholders
- Participated in new IP design sprints from ideation through to prototyping and pitching to a panel
- Designed new processes that incorporated more efficient digital workflows

Equifax Jul 2018 — May 2022

Revenue Accounting Manager

- Designed and implemented a web app to automate our contract reporting process
- Reviewed new contracts and determined the appropriate revenue plan
- Managed the monthly revenue accounting process for several businesses
- Developed new accounting processes for several acquired companies

Equifax Nov 2018 — Mar 2019

Interim Director of Corporate Accounting

- Oversaw the work of local and international accounting teams to complete monthly corporate accounting processes accurately and within required timeframes
- Coordinated with key stakeholders in multiple departments across the organization to inform them of accounting decisions and ensure there was agreement

EY Sep 2015 — Jul 2018

Senior Auditor

- Led hundreds of interviews with process owners to document client's process flows and identify any deficiencies
- Planned testing procedures and coordinated with clients and various internal teams to meet deadlines

PROJECTS

Parks Dept. tylerconn.me/parks-dept

UI Design Concept

- This project involved developing a working prototype that brings together several services for a parks department.
- As the designer on the project, my responsibility encompassed all aspects of the process, including research, design, and prototyping.

Personnel Process tylerconn.me/personnell-process

Process Design / UX Project

- This UX research project was part of an ongoing initiative to upgrade a school district's software and was conducted to identify immediate needs and long-term objectives to drive transformation in the personnel action processes.
